Subject: HB 636

Megan, I would ask that you please submit the information below into the record for the hearing today on HB 636. Unfortunately, I am unable to attend the hearing today.

Members of the House Transportation Committee:

My name is Elaine Taylor and I represent Life Center Northwest which is the agency that handles the organ donor registry for the State of Montana. Today I would like to support the part of HB 636 dealing with the indication of a registrant on drivers licenses in 61-5-301. This section is merely to clean up the code and have consistent language throughout the MCA in regards to Anatomical Giving. The indication of a person who has designated that they are on the registry is a heart on the drivers license and is no longer a separate sticker given to be placed on the driver's license. Regrettably, we missed the deadline for this to be included in the code commissioner bill so we hope that this section of HB 636 will pass to make the code uniform.

Thank you for your time. If you have any questions I may be reached at the number below.
